

IT SYSTEM ENGINEER

Are you passionate about cutting-edge technology? Are you ready to take on the challenge of developing mission-critical communication systems? At Chora, we are looking for a dedicated and talented IT System Engineer to join our innovative team. This is your chance to work on advanced projects in a dynamic environment, collaborate with industry experts, and make a significant impact. If you have a strong background in systems engineering, thrive in a collaborative setting, and are eager to contribute to innovative solutions, we want to hear from you!

YOUR ROLE AND RESPONSIBILITIES

In this position, you will contribute to the development of our mission critical communication equipment used by e.g. the electronic warfare sector. You will be in charge of systems engineering; defining the systems, set requirements, and drive the needed verifications in an agile software development environment.

- You will take technical ownership of system delivery in cooperation with a Project Manager. You will work as technical project manager on smaller scale projects.
- You will coordinate with suppliers, partners, and customers. You will take a holistic view and ensure the right product for our customers.
- You will have a key role in developing and executing integration, verification, validation, and qualification plans and procedures for our products and systems.
- You will be responsible for system integration and deployment, of both own and partner products. You will collaborate with other highly skilled technical engineers to identify and resolve integration issues.
- You will play a crucial role in identifying areas for process improvements and recommending changes to increase efficiency and effectiveness. You will participate in establishing new work processes for the system engineering domain.
- You will be responsible for system documentation (e.g. document test results and provide feedback to development teams).
- You will work with project teams to ensure that our products and systems are delivered on time and within budget.
- You will contribute to developing test cases and perform testing to ensure that our products meet customer requirements (e.g. verifications tests, including FAT/SAT).
- You will take design ownership for selected system configurations. You will participate in design reviews and provide input on testability and test coverage.
- You will be involved in the installation and configuration of both software and hardware components, as well as operating systems.

YOUR PROFILE

- You have a minimum of 5 years of experience as IT System Engineer, preferably more.
- You have a Bachelor or a Master's degree in systems engineering, IT systems, or similar.
- You have proven experience with system engineering, product development and/or technical project management.
- You have solid understanding of Linux/Windows OS and strong IT skills.
- You take ownership of your tasks and responsibilities, just as you thrive on working independently.
- You also enjoy working closely with your colleagues within an agile software development environment.

You live within commuting distance of Aarhus, and you speak and write Danish and English fluently. You have a clean criminal record and you are a Danish citizen or you have lived in Denmark for at least the last 7 years.

ABOUT CHORA

Chora is an international corporation with headquarters in Aarhus and a subsidiary in Munich, Germany. Chora cooperates with acknowledged corporations all over the world. Chora was founded in 1994, and since then we have developed and sold high-tech communication solutions. We sell our products to the B2B and B2G market. Our customer segment is quite different, as we work within a fascinating and interesting niche-market. Chora is a healthy business with sound ownership and an international perspective not to mention strong core values.

If you have any questions or need more information, you are welcome to contact us at tel: +45 86 18 99 55. We look forward to receiving your application and CV at job@chora.com

We review applications continuously, and we treat your information discretely.
